Limitless Computing Develops EASYSKETCH Plugin for SketchUp
Create Professional UK Kitchen Concepts in Minutes

BOULDER, CO - March 10, 2015 - [Limitless Computing Inc.](#)[®], the award-winning leading provider of 3D mobile Augmented Reality (AR), today announced that it has completed development of the new EASYSKETCH Plugin for Trimble SketchUp.

Created for United Kingdom-based [EASYSKETCH](#), the plugin accelerates the kitchen design process for architects, interior designers, kitchen designers, and do-it-yourselfers who use SketchUp. EASYSKETCH includes a full range of cabinets pre-modeled to UK cabinet specifications, allowing detailed designs to be created in minutes, and design changes can be made locally or globally with just a few clicks.

“I am thrilled with new EasySketch plugin that Limitless Computing developed for us,” commented John Atkinson, President, EASYSKETCH. “Now, designing a kitchen is simple. For example, a user can simply select and drag a cabinet choice from the chooser window into the drawing space to start designing. A cabinet can be created by choosing a door style and other finishes from a drop down menu. It’s intuitive.”

“We thoroughly enjoyed developing this plugin for EASYSKETCH and look forward to creating more plugins for clients,” commented Dr. Errin T. Weller, president, Limitless Computing Inc. “It’s gratifying to help them find fun and easy ways for their customers to utilize their SketchUp creations.”

EASYSKETCH is available at <http://www.easysketch.co.uk> for £15 (\$25) per month or annually for £150 (\$250) and includes:

- An extensive catalogue of cabinet styles
- Material swatches from leading brands
- Detailed models with real frontal geometry
- Monthly content updates

Introductory pricing is being offered for 33% off with coupon code 321EARLYBIRD. EASYSKETCH is available for both Mac and PC.

Limitless Computing offers custom Ruby plugin development for Trimble SketchUp. Users are encouraged to contact us with project specifications to get started.
